- No Obligation Scope Out & Proposal
- Hourly Preventative Maintenance
- Contract Preventative Maintenance
- Emergency Repairs
- Controller Maintenance and Repair
- Sensor Maintenance
- Instrumentation Calibrations
- Chemical Feed Rate Calibrations
- Metering Pump Maintenance & Repair
- PLC / DCS Trouble Shooting

Proper maintenance of chemical feed and monitoring equipment is essential to the optimized performance of any water treatment program. Our programs protect our clients' investment in treatment chemicals and the equipment used to administer treatment programs.

We routinely perform maintenance on chemical feed skids, pumps, controllers, monitoring tools and other ancillary equipment associated with special chemical water treatment programs.

Our staff is built around knowledgeable, multidisciplinary experts who have worked in this narrow niche for many years. Frankly, most of the time, we know more about the equipment than the person who sold it.

We understand how this equipment works and how important proper maintenance can be to productivity, cost containment and safety.

We have a comprehensive offering of programs that can benefit anyone who is administering a chemical treatment program. If you are paying for treatment chemicals or have the job of making sure they work, we can help.

Whether our customers select an hourly or a contract based preventative maintenance program, we provide a well defined program to fit the realities of their operation, with an emphasis on minimizing downtime and maximizing efficiencies.

Ask for a no obligation scope out and proposal the next time you need to work on your chemical feed equipment and keep our number handy for emergency repairs!
