New VTouch Feature for WebMaster Series Controllers

Walchem Announces New Innovation

April, 2011

Walchem is pleased to announce the VTouch feature in its WebMaster series controllers. The innovative features of VTouch provide you with a quick, centralized 24/7 awareness of account status with the ability to LIVE Connect to any of your controllers in the field with one simple mouse-click, regardless of connection type! No phone numbers or IP addresses to remember.

The VTouch Account Manager is fully synchronized with Walchem's web-based controllers, making set-up and configuration simple and fast. Just specify the type of remote communications needed for new or existing controllers and Walchem takes care of the rest.

No need to sort out and track complicated and constantly moving cellular data or dial-up ISP plans from large companies with poor customer service and unpredictable monthly charges. VTouch solves these problems by bundling the communications services, giving you a completely turn-key solution.
